

Remote collaboration tool  
for medical professionals

What is medVC?

Real-time audio-video collaboration for doctors

Multiple videos from medical devices

# medVC

Remote consultations and medical education

Pausing, drawing, snapshots, recording, live streaming

# Compatibility

Medical cameras, microscopes, endoscopes, C-arms, surgical robots  
and other medical video devices

Storz, Olympus, Medtronic, Zeiss, Intuitive Surgical,  
Trumpf Medical, ConMed and others

# Compatibility

- WebRTC – any device, any system
- Dedicated OR setups
- Dedicate conference room setups
- Use your own device

# Competition

zoom

High medical video quality	Lower video quality (below HD)
Multiple videos from the OR	1 video from 1 participant
Live video pausing	No pausing
Telestration - drawing on any video	Screensharing drawing only, not on medical video
Dedicated secure solution for medicine	Cloud-based consumer market solution

# Competition

zoom

 Polycom

 Microsoft Teams

Personalization of deployment: logo, name, domain	No or limited personalization
Functionality customization upon request	Of the shelf product – no customization
Secure recording with automatic upload to storage	Recording with access only using public cloud
Integrated streaming for education and events	No integrated streaming
Dedicated support	Consumer market support level

# Scenarios

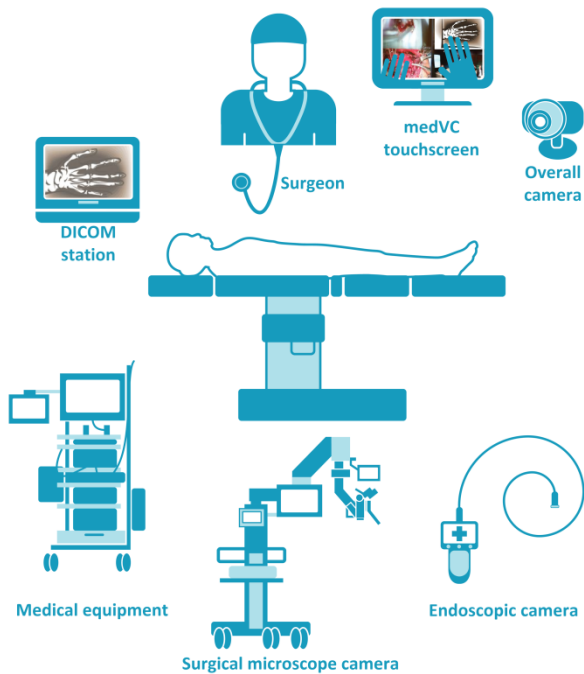

# Users

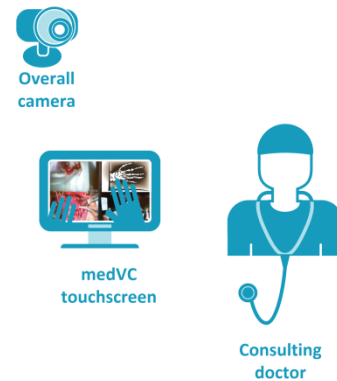

# Remote supervision

## OPERATING ROOM

## DOCTOR'S OFFICE

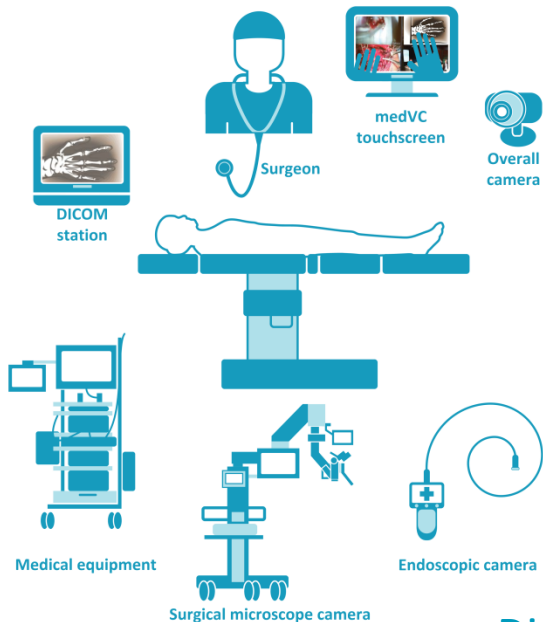

- 
- Realtime communication
  - Multiple medical video feeds
  - DICOM images
  - Pausing of video feeds
  - Marking areas & drawing on the picture
  - Video recording
  - Taking snapshots

Consulting from the office  
Supervising young surgeons  
Instant advice

# Smartphone supervision

## OPERATING ROOM

## Anywhere, anytime

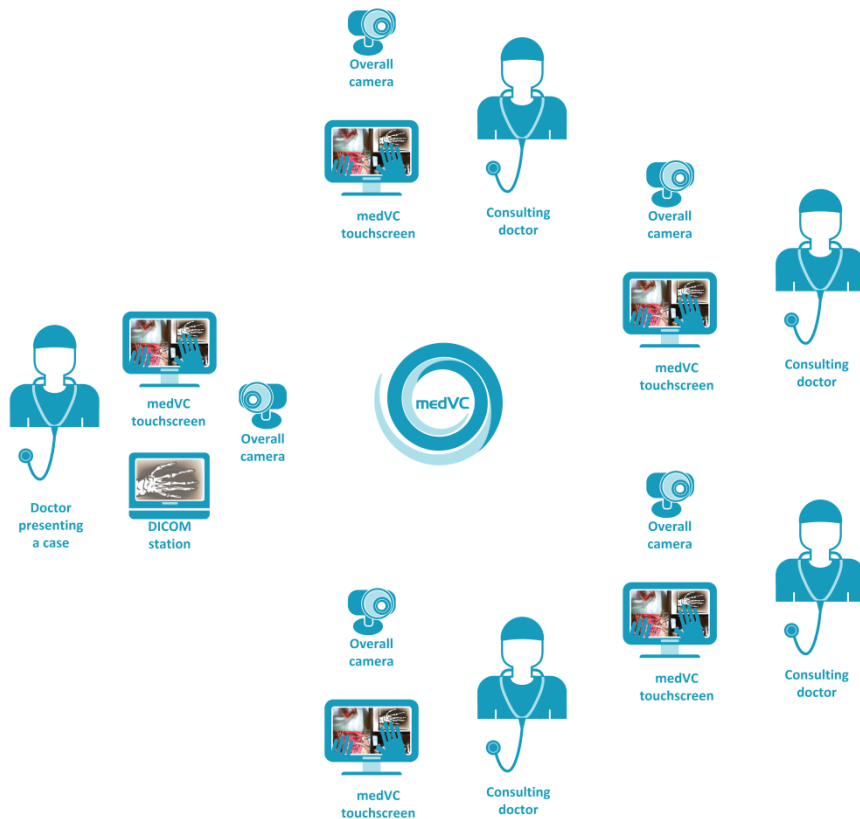

Live video and audio  
from the OR

Multiple medical video  
feeds

DICOM images

Direct feed from the OR  
Supervising young surgeons  
Any device - smartphone, tablet, PC

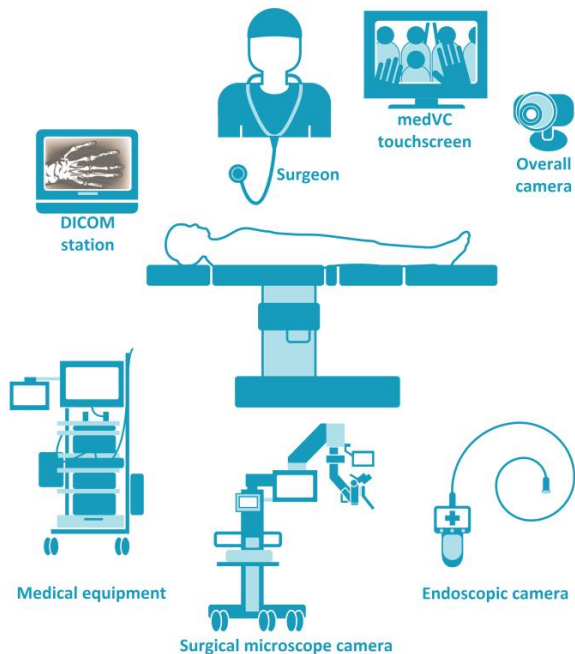

# Case conference

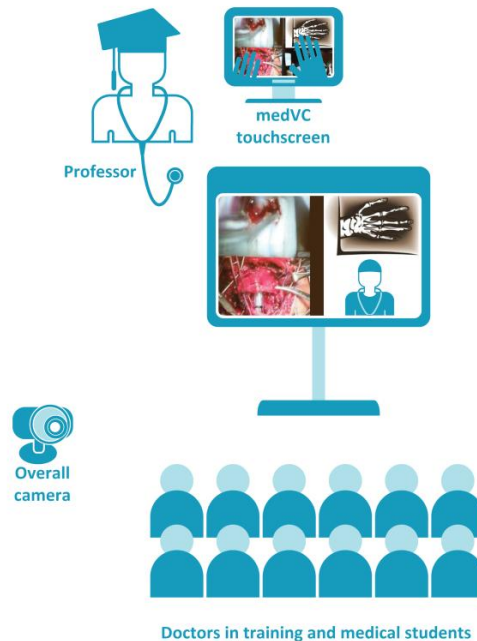

Discussing a difficult case  
Preparing for the surgery  
Multidisciplinary advice  
Involving specialists from various hospitals

# Medical education

## OPERATING ROOM

## CONFERENCE ROOM

- Realtime communication
- Multiple medical video feeds
- DICOM images
- Pausing of video feeds
- Marking areas & drawing on the picture
- Live video streaming & recording
- Taking snapshots
- Stereoscopic 3D video

# Interactive Medical University

OPERATING ROOM

CONFERENCE ROOM

Live broadcast of any session  
Recordings published on dedicated portal  
Content prepared by medical professors

Hundreds of  
students at home

# Event broadcasts

Thousands of viewers worldwide

Participate in medical broadcast  
Show interesting surgeries  
Promote your hospital

Live surgery broadcasts  
and conferences

# Live connection from ORs

# Streaming

- medVC Terminals with built-in streaming
  - 1-click streaming
  - Self-managed
  - Suitable for daily usage and local events
  - Supports up to 500 viewers
  - Copy and paste player code for use on your own website

# Streaming

- Event streaming
  - All audio-video and streaming equipment provided by medVC
  - medVC technical personnel available in the OR
  - Suitable for large events and conferences
  - Supports thousands of viewers worldwide (CDN)
  - Player can be integrated into the customer's website, or medVC can provide a dedicated website

# Interactive live surgery

- All videoconferencing, audio-video, and streaming equipment provided by medVC
- medVC technical personnel available in the OR and conference hall
- Real-time interaction between one or more ORs and the conference hall
- medVC tools available: multiple medical videos, telestration, video pausing
- Live events can also be streamed to increase reach

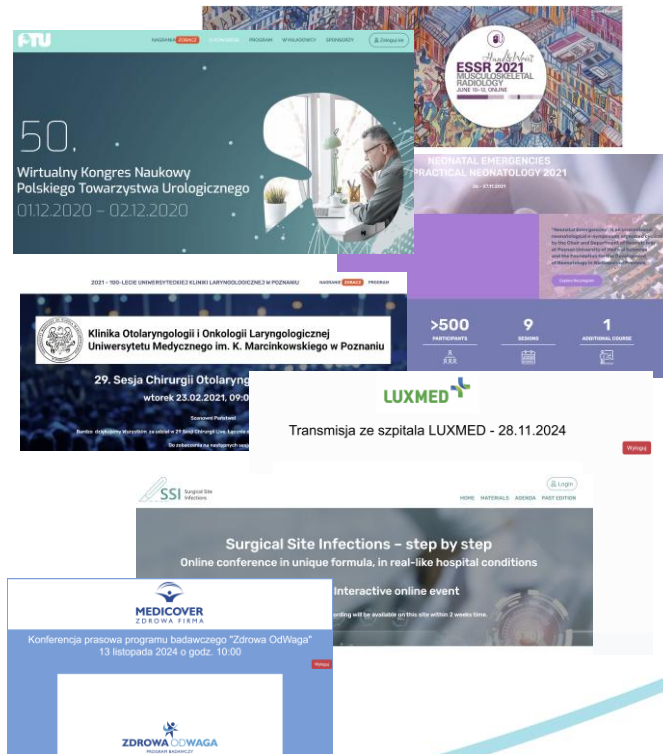

# Integration

- medVC provides a holistic platform for interactive live surgery and streaming, offering all necessary components.
- Upon request, medVC can integrate with other solutions, including:
  - Videoconferencing (Zoom, Teams, Webex, and others).
  - Webinar platforms (Zoom Webinars, ClickMeeting, GoToWebinar, and others).
  - Streaming services (Vimeo, Facebook, YouTube, and others).
  - Learning Management Systems (Moodle, Canvas, Edmodo, and others).
- medVC provides seamless videoconferencing and streaming on any platform, allowing clients to continue using their existing platform without the need for changes or migration.

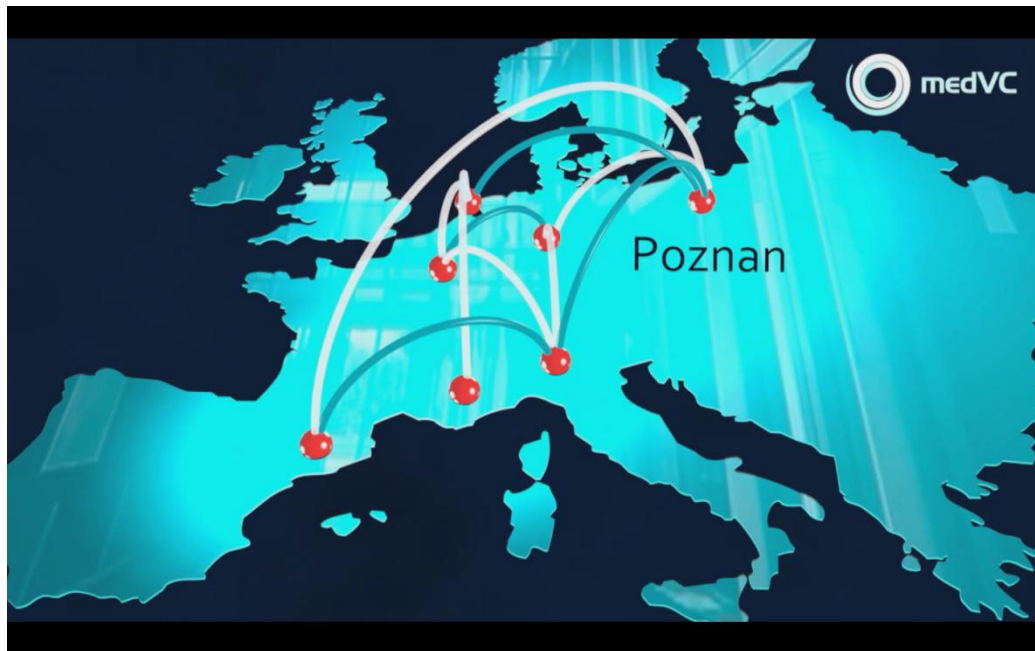

# Events in numbers

- Conferences: 50+
  - In-person, hybrid, and virtual formats
  - Full conference hall setup with medVC technical crew
  - Conference portal with streaming capabilities
  - Post-production of recorded sessions
- Surgery event sites: 200+
  - All necessary equipment provided
  - medVC technical crew available in the ORs
  - Interactive connections, streaming, or recording
- Self-managed events: 500+

# Technical information

# medVC OR Pro

- Main unit (10 video inputs)
- Overall FullHD PTZ camera
- Medical touch-screen monitor
- Integrated audio-video devices
- Wireless headset microphone
- Loudspeaker
- Additional equipment according to needs

# medVC OR Smart

- Medical all-in-one computer (4 SDI video inputs)
- Webcam overall camera
- Wireless headset microphone
- Loudspeaker
- Additional equipment according to needs

# Other locations

- Use your own device
  - Device: PC, laptop, tablet, smartphone
  - OS: Windows, MacOS, Linux, Android, iOS
  - Browser: Chrome, Edge, FireFox, Safari
  - Test it yourself  
<https://demo.or.medvc.eu/or1>
- We also can provide dedicated terminals for other locations

# medVC OR Integrator set

- Main unit (2 video inputs)
- Medical touch-screen monitor
- Audio device

# medVC Conf setups

- Main unit (2 video inputs)
- FullHD PTZ camera
- Touch-screen monitor
- Audio device
- Handheld microphone
- Loudspeaker

# medVC Office setups

- Main unit (1 video input)
- FullHD USB camera
- Touch-screen monitor
- USB speaker-phone

# Software-only version for Operating Room Integrators

- Benefits for OR Integrators
  - Use own, trusted and established hardware providers
  - Lower costs of a deployment
  - Reach more customers by providing new functionality
  - medVC helps with the hardware specification for each deployment
  - Software installation done by medVC
  - Full support from medVC
- Benefits for customers
  - No separate system – seamless integration with the OR system
  - Single point-of-contact in case of hardware problems
  - Telemedicine functionality beyond standard videoconferencing solutions

# Deployment

## Cloud servers

medVC Terminals  
in hospital

Server in an external  
data centre

External  
participants

# Deployment

## Servers in hospital

medVC Terminals  
and servers (public IPv4  
address needed)  
in hospital

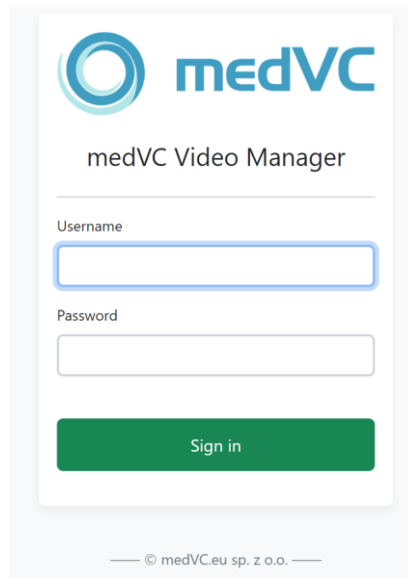

External  
participants

# Recording server software

- Cloud or on-premise installation
- 4 CPU cores required per operating room
- WYSIWYG - records the layout of the operating room
- Storage requirements:
  - Local storage: at least 2×4TB in RAID 1 configuration
  - Automatic upload to video storage
- Live streaming: To a CDN endpoint
- Optional – not required for videoconferencing

# Dedicated Video Manager

- Cloud or on-premise installation
- 1-click recording
- 1-click streaming
- Functionality
  - View recordings
  - Trim recordings
  - In-recording markers for easy navigation
  - Search recordings
  - Download recordings
  - Delete recordings
  - Access live streaming channels

The image shows a login interface for the medVC Video Manager. At the top left is the medVC logo. Below it, the text "medVC Video Manager" is displayed. There are two input fields: "Username" and "Password". Below the password field is a green "Sign in" button. At the bottom of the interface, there is a small copyright notice: "© medVC.eu sp. z o.o."

# Technical data

- Easy to use touch-screen interface (like a smartphone interface)  
Demo room: <https://demo.or.medvc.eu/or1>
- Connect any medical device with a video output
- Independent video streams with full quality
  - Transmission of up to 3 video streams from any of the 10 inputs
- Support for
  - 2D video
  - 3D video (e.g. from 3D endoscopes or the da Vinci robot) – additional 3D display equipment needed
- Transmission formats
  - HD 720p
  - Full HD 1080p
  - 4K
- Professional audio quality

# Technical data

- Medical collaboration functions
  - Multiple medical videos
  - Pausing of videos
  - Drawing on videos
  - Audio-video recording and automatic upload
  - Live streaming to the Internet to any device

# Technical data

- Accepted video inputs (additional scalers or converters may be needed)
  - HDMI / DVI
  - SDI (SD-SDI, HD-SDI, 3G-SDI, 6G-SDI)
  - VGA
  - Composite Video
  - Component Video
  - S-Video

# Technical data

- SFU (Selective Forwarding Unit) server
  - Multisite collaboration
  - ICE-Lite support
  - DiffServ support for network prioritization
  - Simulcast and SVC support (quality adaptation)

# Technical data

- Video Manager (additional option)
  - storage and access to recorded videos
  
- Live streaming (additional option)
  - broadcast to thousands of Internet viewers using practically any device, anywhere around the world

# Security declaration

In medVC the Sensitive Personal Information is secure and cannot be known or transparently modified by other parties on the streams route.

For accessing the web-app, HTTPS must be used - what the browser uses, WebRTC uses (i.e. TLS 1.3)

Encryption is a mandatory feature of WebRTC, and is enforced on all components, including signalling mechanisms. Resultantly, all media streams sent over WebRTC are securely encrypted, enacted through standardised and well-known encryption protocols. The encryption protocol used depends on the channel type; data streams are encrypted using Datagram Transport Layer Security (DTLS) and media streams are encrypted using Secure Real-time Transport Protocol (SRTP).
